

Abdullah Al Fuad

Dhaka, Bangladesh

GitHub | Portfolio | LinkedIn

fuadkalaroa2002@gmail.com | 01902780443

Professional Summary

Computer Science student and Full Stack Developer with experience in Flutter, Java, Node.js, Express.js, MySQL, and Firebase. Skilled in building scalable mobile and web applications, integrating REST APIs, and solving real-world problems.

Education

B.SC. IN COMPUTER SCIENCE & ENGINEERING (CSE)

Green University of Bangladesh

CGPA: 2.67/4.00 | 2022–2026 (Expected)

Last 2 Semester GPAs: 3.06, 3.41

HIGHER SECONDARY CERTIFICATE (HSC)

Kalaroa Govt. College

GPA: 4.25/5.00 | 2019–2021

Skills

- Mobile Development: Flutter, Android Studio
- Programming Languages: Java, Dart
- Backend Development: Node.js, Express.js, REST API
- Database & Cloud: MySQL, Firebase
- Tools & Version Control: Git, GitHub

Experiences

Founder & Full Stack Developer

Softece (Personal Startup) | Oct 2021–Present

Flutter, Node.js, MySQL, JWT Authentication, REST API, PM2 Deployment

Freelance Mobile App Developer

Self-employed, Dhaka | Nov 2021–Mar 2024

Android App Development, Google Play Publishing, Client Project Delivery

Computer Office Application

Rifat Computer Training Center, Satkhira | 2018–2019

MS Office, Typing (Bangla/English), Data Entry, File Management

Projects

Plantive

- **Java • Firebase • Google Maps API • Weather API • OpenRouter API • Gemini API**
- AI-powered smart plant care and marketplace application.
- Plant care reminders, care history, community, buy/sell, maps, and weather integration.

UniMate

- **Flutter • Node.js • Express.js • MySQL • REST API**
- All-in-one student productivity platform with attendance, CGPA, routine, and exam management.
- AI PDF summarization, expense tracking, mess management, habit tracking, and 58+ integrated tools.

SMS

- **Flutter • Dart • Shared Preferences • Speech-to-Text • Text-to-Speech**
- AI-powered cross-platform SMS application with offline-first architecture.
- Smart inbox, voice messaging, AI tools, search, dynamic themes.

Smart Homeopathy Doctor

- **Flutter • Node.js • MySQL • Gemini API**
- AI-powered homeopathy platform for symptom analysis and treatment recommendations.
- Doctor consultation, appointment booking, medicine marketplace.

Pyrova

- **Flutter • Node.js • MySQL • Gemini API**
- AI-powered fitness platform with personalized workouts and nutrition management.
- Workout tracking, health analytics, goal setting, and community features.

DeenSphere

- **Flutter • Node.js • MySQL**
- AI-powered Islamic application with Quran, prayer tools, and community features.
- Integrated Firebase services, Halal marketplace, and AI-powered Islamic guidance.

Khidda

- **Flutter • MySQL • Firebase Auth • Stripe • REST API**
- Developed a cloud kitchen food delivery platform connecting Bangladeshi home chefs with customers in Canada.
- Implemented secure authentication, Stripe payments, real-time order tracking, and an admin dashboard.

Agriculture Information Service

• **HTML • CSS • JavaScript • MySQL**

- Web-based agricultural information platform for farmers.
- Provides crop recommendations, weather updates, and market information.

GreenMind

• **Python • LangChain • PyTorch • ChromaDB**

- Developed a RAG-based AI assistant using LangChain, ChromaDB, and Qwen LLM for document-based question answering.
- Implemented classic AI search algorithms including BFS, DFS, and IDDFS with Python.

Investment Management System

• **Java • JavaFX • Maven • MySQL | • Assembly**

- JavaFX desktop application for investment and profit management.
- Supports user registration, balance tracking, deposits, and withdrawals.

Bangla SMS Spam Detection

• **Python • Scikit-learn • Pandas**

- Machine learning-based Bangla SMS spam detection using TF-IDF and Naive Bayes.
- Performed text preprocessing, feature extraction, and model evaluation.

Nebula Navigator

• **Bash • Shell Scripting • Linux**

- Terminal-based star record management system with authentication and CRUD operations.
- Advanced search, distance sorting, and persistent file storage.

Student Management System

• **C • File Handling • GCC | • C++**

- Terminal-based student record management system with CRUD operations.
- Student registration, search, update, delete, and file storage.

BitGuard

• **Java • JavaFX • Maven**

- Desktop application for simulating CRC, Hamming Code, Checksum, and Bit Stuffing algorithms.
- Built with JavaFX using the MVC architecture for interactive learning.

Campus Network

• **Cisco Packet Tracer • Networking**

- Simulated a campus network with VLANs, OSPF, DHCP, DNS, and ACL security.
- Implemented inter-VLAN routing and wireless network connectivity.

Converter

- **C++ • Binary Arithmetic • CLI**

- Implemented Restoring and Non-Restoring Division algorithms for binary arithmetic simulation.
- Built an interactive CLI with step-by-step register tracing and binary conversion.

Cyber Password Strength Analyzer

- **C++ • Cyber Security**

- Built a password analysis tool to evaluate password strength and security risks.
- Implemented password scoring, attack simulation, and terminal-based visualization.

3D Home

- **AutoCAD 2024 • 2D CAD • 3D Modeling**

- Designed 2D and 3D architectural drawings for the Plantive smart gardening ecosystem.
- Created technical layouts and spatial planning using AutoCAD.
